

Canadian hosting for restaurants: planning checklist

Host your menu, hours and reservation links on a website your team can update. Plan any booking and ordering integrations before moving.

What to check

Website and applications

List the pages, forms, email accounts and applications included in the project. Note what will stay with another provider.

Software and resource needs

Check menu updates, opening hours, reservation links, maps and online ordering integrations.

Account access and renewals

Record who owns the domain and hosting account, pays renewals and approves changes. Use individual logins where supported, and keep recovery access available to the owner.

Backup and handover

List the files, databases and mailboxes that need a backup. Agree who checks restores and who hands over access when a staff member or supplier leaves.

Before you proceed

Check that staff can update menus and hours. Test reservation and ordering links after a move.

Services to compare

Check the linked product pages for current prices, included resources, availability and terms.

Web hosting

Shared hosting for websites and email, with Virtualmin included. Check the current plan limits and optional software charges.

Migration help

Get help planning a supported move. Agree on scope, tests, cutover timing and rollback before switching live traffic.

Domains

Register, transfer or renew a domain and manage DNS. Check extension-specific eligibility, transfer rules and renewal prices.

Ask about your project

Send the software, capacity, location and timing requirements. Confirm any feature not shown on the current product page before ordering.

Your project notes

Keep this page with your project. Do not write passwords, private keys or other secrets here.

Project / website	
Software and data	
Service / full ongoing cost	
Account owner / administrator	
Backup location / restore test	
Move or launch date / rollback plan	

Software and data: Which application, files, databases and integrations are included?
People and timing: Who owns the service, who maintains it, and when must the work be finished?
Budget and recovery: What is the full ongoing cost, and how will you recover if the change fails?
