

# Canadian web hosting with monthly billing: planning checklist

Pay month to month for your website and email. Compare included features, current rates and cancellation terms before ordering.

## What to check

### Application requirements

Check monthly Canadian hosting where cash-flow flexibility matters more than prepaying a long term, so the regular monthly price, renewal behavior, cancellation process, and migration portability should be visible.

### Full service cost

Compare the regular price and billing term, taxes, software licences, extra storage and backups. Check what changes when a promotion ends.

### Who manages the server

Confirm who handles updates, access, applications, firewall rules and restores. Standard DotMoose VPS plans are self-managed; shared hosting has a different support scope.

### Capacity and upgrades

Measure normal and peak use. Choose enough room for the workload and check the cost and process of increasing resources later.

## Before you proceed

Confirm the current product specifications and service responsibilities. Record who can approve a change and how to recover the service if it goes wrong.

# Services to compare

Check the linked product pages for current prices, included resources, availability and terms.

## Web hosting

Shared hosting for websites and email, with Virtualmin included. Check the current plan limits and optional software charges.

## Migration help

Get help planning a supported move. Agree on scope, tests, cutover timing and rollback before switching live traffic.

## Domains

Register, transfer or renew a domain and manage DNS. Check extension-specific eligibility, transfer rules and renewal prices.

## Ask about your project

Send the software, capacity, location and timing requirements. Confirm any feature not shown on the current product page before ordering.

# Your project notes

Keep this page with your project. Do not write passwords, private keys or other secrets here.

|                                            |  |
|--------------------------------------------|--|
| <b>Project / website</b>                   |  |
| <b>Software and data</b>                   |  |
| <b>Service / full ongoing cost</b>         |  |
| <b>Account owner / administrator</b>       |  |
| <b>Backup location / restore test</b>      |  |
| <b>Move or launch date / rollback plan</b> |  |

Software and data: Which application, files, databases and integrations are included?

People and timing: Who owns the service, who maintains it, and when must the work be finished?

Budget and recovery: What is the full ongoing cost, and how will you recover if the change fails?
